PROFILE

Third-year Software Engineering undergraduate at the University of Kelaniya (Dean's List, CGPA 3.91/4.00), specializing in Net-Centric Applications, Business Engineering, Data Science, and Health Informatics. Hands-on experience building scalable backend systems using Java, Spring Boot, and PostgreSQL, including secure, event-driven pipelines with Apache Kafka. Seeking a Software Engineering Internship to contribute, learn, and grow while building reliable products at scale.

EDUCATION

B.Sc (Hons) Software Engineering, University of Kelaniya • Third-year undergraduate • Current CGPA: 3.91 / 4.00 • Dean's List (Year 1) — GPA: 3.91 / 4.00	04/2024 – present Sri Lanka
GCE Advanced Level Physical Science Stream, Royal College, Colombo 7 • Z-score: 1.5558 • District Rank : 480	01/2020 – 02/2023 Sri Lanka

PROJECTS

Multimodal RAG Agent — Document Q&A LangChain, ChromaDB, Gemini, (Backend/AI Pipeline) 🔗 • Built a multimodal RAG pipeline using unstructured (hi-res) to extract text, tables, and images from PDFs with title-based chunking. • Used Gemini to generate AI-enhanced searchable summaries of tables/images, embedding chunks into a persistent ChromaDB vector store. • Implemented history-aware query rewriting and MMR retrieval, with an LCEL multimodal chain feeding Gemini for grounded answer synthesis. : Python, LangChain (LCEL), Unstructured, ChromaDB, Google Gemini (multimodal + embeddings)	08/2026 – Present
Vektor — Real-Time Logistics & Payout Engine Apache Kafka, Spring Batch, Docker 🔗 • Engineered a distributed backend pipeline separating high-velocity telemetry ingestion from batch financial processing, utilizing Kafka (KRaft mode) to ingest real-time GPS and delivery-status events. • Developed a partitioned Spring Batch pipeline to calculate daily driver payout statements, guaranteeing zero-data-loss bank dispatch using the Transactional Outbox pattern. • Dockerized the reproducible local infrastructure, built a Python producer to simulate live driver telemetry for testing, and secured the APIs with Keycloak (OAuth2), Redis rate-limiting, and Resilience4j. : Java, Spring Boot, Spring Batch, Apache Kafka, Python, Docker, Keycloak (OAuth2), Redis, Resilience4j, Prometheus, Grafana, Loki, Promtail, Flyway, JUnit 5	07/2026 – 07/2026

- Built a multi-tenant, event-driven Spring Boot backend (JWT, RBAC, AES-GCM PII encryption, Redis caching, Flyway database migrations) with JPA locking to prevent double-booking under high load.
- Added Prometheus/Actuator monitoring and Stripe payment integration for production-grade reliability.
- Built a React + Tailwind frontend with an interactive SVG venue map and QR-based mobile check-in. **(Frontend)** [↗](#)
: Java, Spring Boot, PostgreSQL, Redis, Flyway, JWT, Keycloak, Stripe API, Spring Boot Actuator, Prometheus, React, Tailwind CSS, Shadcn UI, Zustand

UOK Connect – Student Project Showcase Portal | Node.js, Express.js, Passport.js [↗](#)

06/2026 – 07/2026

- Built a portal connecting students and recruiters, with Google OAuth login, project publishing, and an additive-only admin panel designed to avoid destructive schema changes.
- Implemented rate-limiting and validation middleware (Helmet, express-rate-limit, express-validator) for a hardened public-facing API.
- **Deployed and maintained** a live production instance on Vercel. [↗](#)
- Collaborated with a team of five to deliver complete product.
: React, Zustand, Node.js, Express.js, Passport.js (Google OAuth 2.0), PostgreSQL (Neon), Cloudinary, JWT

SKILLS

Programming Languages

- Java, Python, JavaScript, Dart, Kotlin, PHP, C, C++

Databases

- PostgreSQL, Redis, MongoDB, MySQL, ChromaDB

DevOps & Observability

- Docker, Git/GitHub, Prometheus, Spring Boot Actuator, Vercel

Concepts

- Event-Driven Architecture, Object Oriented Programming, Data Structures & Algorithms, RAG, Multimodal AI

Frameworks / Libraries

- Spring Boot, Spring for Apache Kafka, Node.js, Express.js, React.js, Next.js, Flutter, LangChain

Infrastructure / Messaging

- Apache Kafka

Security & Identity

- JWT, OAuth 2.0, RBAC, AES-GCM Encryption, Keycloak

Tools & Practices

- Linux, Postman, Figma, Unstructured

VOLUNTEERING

IEEE Student Branch (UOK), Design Team Member

02/2025 – 05/2025

- Designed promotional materials, event flyers, and social media graphics for IEEE events and activities.
- Collaborated with the design team on IEEE branding content.

Sri Lanka

LANGUAGES

English

Tamil

Sinhala
