- Developing a complete e-commerce platform with secure payment gateways.
- Building both front end and back end using modern technologies.
- Designed the UI in Figma to ensure responsiveness and user engagement.
- Collaborating with a team of three to deliver all features.

: PHP, JavaScript, HTML, CSS, Figma

Stall Reservation System | Java, Spring Boot, PostgreSQL & React.js 📍 03/2026 – Present

- Developing a scalable full-stack reservation platform using Spring Boot, React.js, and PostgreSQL.
- Building RESTful APIs, responsive frontend interfaces, and secure reservation management features.
- Implementing email notifications and QR code generation for reservation verification.

: Java, Spring Boot, PostgreSQL, React.js, Tailwind CSS, JavaScript, JWT, QR Generation

- Developing an enterprise-grade offline-first retail management system for POS operations.
 - Building cross-platform applications using Flutter with Isar NoSQL for fast offline synchronization and barcode scanning.
 - Engineering secure backend services using Java 21 and Spring Boot with RESTful API architecture.
 - Designing hybrid database architecture using PostgreSQL and MongoDB for transactional consistency and inventory management.
 - Utilizing Riverpod, Freezed, and Spring Security for scalable state management and JWT-based authentication.
- : Flutter, Dart, Java 21, Spring Boot, PostgreSQL, MongoDB, Isar, Riverpod, Freezed, JWT, Tailwind CSS, Figma
